topic'it

Forum's mobile application lauching

AVAILABLE ON THE **App Store**

GET IT ON **Google play**
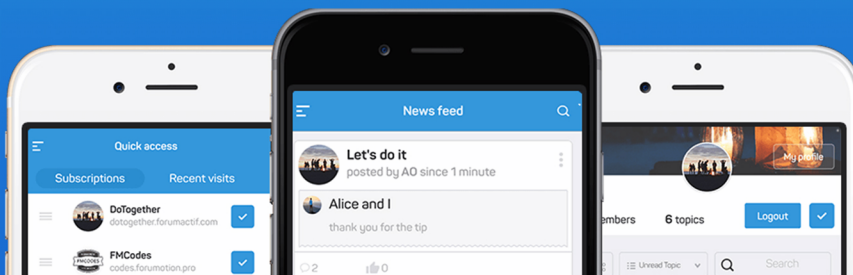

> "You can say goodbye to the complicated forums and their outdated design...
> Topic'it makes you redicover the forums with a modern, fast and simple interface, and everything is 100% on mobile and free !
>
> You won't miss any discussion anymore thanks to Topic'it !

A SIMPLE and FREE mobile app to access to your favorite forums.

Available free of charge on iOS and Android

The Topic'it application's purpose is to give a new youth to the forums by providing a modern interface, adapted to mobiles and tablets.

You can also add your own message boards thanks to an API. The documentation about it is available on the website of the application.

Easy to use, Topic'it will make you rediscover the forums through a fonctionnal and intuitive application, available on mobile devices.

Searching, consulting and participating to a forum has never been so nice and easy !
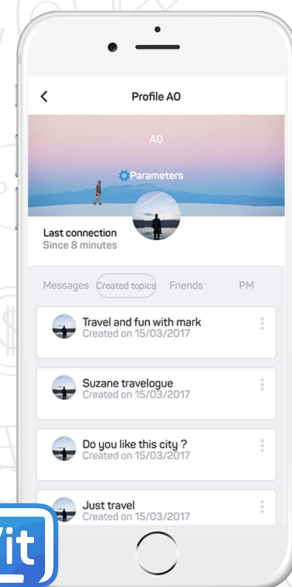

You can find and administrate your favorite forums on a unique mobile application, and you'll enjoy all the Topic'it advantages : following as many forums as you want, signing up easily to the forums (SSO), a notifications system, private messages... And above all, you can stay connected with your community !

Of course, you'll find back all the message boards fonctionnalities : exploring the conversations, creating a topic, posting a new answer or sending private messages.

To sum up, it's a new way to go through the discussions forums.

Topic'it is the "rendez-vous" of the people who love to share their passions. Stay connected to your favorite communities wherever you are and discover forums and online communities !

we invite you to try our new App today and welcome to Topic'it!

"With Topic'it, we wanted to offer a unique and new experience for the forums users. Giving a fast, useful and nice mobile navigation on these websites appeared like a priority in this new digital age where the user's experience has never been so important".

Cédric Kocher
Project Manager

The e-Toxic company, specialised in the Research and Development of internet applications and web services dedicated to the virtual communities, presents its new application : Topic'it.
